

## UNICEF High School Clubs February Resource Calendar

### Featured Topic: Education and Gender Equality

Around the world, UNICEF is committed to full and complete access to free quality education for every girl and boy. Still, there are currently an estimated 57 MILLION primary school children who are not in class, over half of whom are girls. UNICEF aims, through its country programs, to promote the equal rights of girls to an education and support their full participation in the political, social and economic development of their communities.
